Sen. Percy to speak Friday

Sen. Percy, a member of the Senate Government Operations Committee, has worked for the establishment of an independent Watergate prosecutor and last week introduced the first resolution on this subject in the Senate.

By Carl Haxlett
Managing Editor

Earl J. Neff of Parma is excited about the rush of Unidentified Flying Objects (UFOs) sightings this month. "It makes me wonder if we're living in the future of space travel," Neff said.

The director of the Cleveland Ufology Group and representative of the International UFO Network (SIOB), Neff spends nearly all of his time searching for and studying UFOs.

"They (the UFOs) are even more mysterious than I thought they were," Neff said. "But I'm not sure about the country of the country I'm studying in.

On the other hand, Neff said that the UFOs are "simply" the products of government experiments.

"I object mostly because these are the same UFOs that the government has been experimenting with for years," Neff said.

Neff also spoke recently in Pittsburg, Pennsylvania, where he has been traveling around the country, looking for UFO sightings.

"They (the government) know more about them than we do," Neff said. "But I'm not sure if they're trying to keep it a secret."
NEW YORK, N.Y.—As the Watergate scandal likely to cause a revolutionary change in American’s voting habits.

**Housing Code**

It’s easy to talk about fire safety after a blaze guts local apartment unit. But few people are concerned enough to take precautions so another tragic fire doesn’t occur.

After two fires last spring at University Village and Greenview Apartments, residents were urged to take precautions to reduce the county’s fire alarm systems.

That’s why we’re taking the form of a constructive solution. Howard Battle, city fire chief and assistant to the safety service director, Bill Arnold, Student Body president (SBO president), and John Ferruccio, SBO steering committee member, are back to the topic of fire safety.

Arnold and Ferruccio leaned on local landlords and city officials to help.

Arnold also urged students, through a News story, to attend and show support for the proposed fire safety measures.

The Fire Department explained that circular battery-operated device operates on the ventilation principles.

That is, when products of combustion—smoke or invisible—enter the small chamber of the detector, the electronic sensor detects the minute changes and causes the alarm to sound.

Watkins said student detectors have an advantage over heat detectors because “With fire first start by heat alone.”

But unfortunately, too few people have heard an explanation.

In Bowling Green, there are only eight fire alarms throughout the city. Two were plied.

This is an indication of the amount of concern for fire safety in this community, we’re all in shape, but our fire safety is not up.

Arnold said he’s distributing information on Sunday’s meeting to all landlords who were present.

And also, he said, more meetings will be held.

But action doesn’t start with a committee or council—it also starts with the students.

“More to the point the project can be completed without student help,” Arnold said.

“I think the late students must talk to their landlords and councilmen at once. Tell them you’re worried about fire safety.”

Ask them to contact Battle, Arnold or Ferruccio if there are any questions.

Make the effort now. Another tragic fire isn’t worth the price of admission.

MALCOLM, who advocates his T-shirts on the Capitol steps, is currently: “I was not really surprised to hear that he was put in jail.”

He is thinking of Nixon as the person who, if not the architect of Watergate, was at least a great benevolent dictator responsible for the Watergate linen will re-emerge.

*TheColony: Politics is the art of the dirty tricks.*
Energy crisis blamed for recession danger

WASHINGTON (AP) — The energy crisis has evidently chilled the Nixon administration's hopes of bringing the U.S. economy to a "soft landing" next year and increased the danger of a recession.

Government economists, busy trying to assess the impact of the Arab oil cutoff, said they expected rising prices of products dependent heavily on energy.

The situation could develop into a recession if the administration cannot do the job of allocating fast enough and the consumer decides to buy less, said one highly placed economist who asked that his name not be used.

"If IT changed the psychology of the consumer, we could be in a badly behaved recession," he said.

The administration had been predicting an economy slowing down this year but growing strongly next year. The latest recession was in late 1970 after Nixon's first oil embargo with his "price for peace" strategy.

There was no mass movement to slow the economy, as price controls, as many feared, did not do their job, said the unnamed economist.

Fielder said, however, he does not see a recession developing.

A RECESSION seems to be the broadest measure of the situation. Grand National Product, declines for two straight quarters.

The last recession was in late 1970 after Nixon's first oil embargo with his "price for peace" strategy.

Fielder said, however, he did not see a recession developing.

WASHINGTON, Jan. —

Nearly six years after America's richest pool of oil was discovered on Alaska's North Slope, a bill authorizing the construction of the pipeline is on its way to Congress today, but ecologists and environmentalists are making clear that they have the leverage they need to influence its fate.

The pipeline, authorized under the Energy Policy Act of 1978, would carry about two million barrels daily of oil from the Prudhoe Bay area of Alaska, discovered in February 1968, to New York City and the East Coast, a distance of 1,900 miles. Once there, the oil would be pumped to the Gulf of Mexico for shipment to Europe, Japan and other parts of the world.

The House bill was the result of a long struggle in Congress and the courts by environmentalists who feared damage from oil spills, the largest contamination ever threatened. The Senate bill, which will be considered today, is expected to receive similar treatment in the House.

"Nearly three years after the joint inquiry into the Watergate scandal, and after the Watergate suit, which now has become a crusade against Richard Nixon and the Republican party, the two major American public movements of the seventies are joined," said Representative Rick Kow, a Democrat from California.

In the House, the bill was sponsored by Representative James Oberstar, a Democrat from Minnesota, who is chairman of the Interior and Insular Affairs Committee. In the Senate, the bill was sponsored by Senator Edward Kennedy, a Democrat from Massachusetts.

The bill would create a new federal agency to oversee the construction and operation of the pipeline, and would require the agency to consult with the Interior Department and the Environmental Protection Agency on the environmental impact of the pipeline.

The Administration has opposed the bill, saying that it would be too costly and would create unacceptable environmental risks. The Administration has also opposed the idea of building the pipeline in parts, arguing that it would be too disruptive to construction.

The Administration has also argued that the pipeline would not be needed because the oil from the North Slope is of high quality and can be easily refined.

But critics, including Representative Oberstar, say that the Administration is simply trying to delay the issue of the pipeline until after the next election in 1980.

"The Administration's position is simply a delaying tactic," said Representative Oberstar. "They are trying to keep this issue out of the public debate until after the election, and then they will say that the public doesn't want it."
Foreign students 'treated well'

Food, family, friends missed

By Rick Newman

Living in an American university can be exhilarating, but it can be challenging too. New students often struggle to adjust to the differences between their home country and the United States. In this article, we will explore some of the challenges faced by foreign students at Ohio State University and the support systems in place to help them succeed.

The Three University students agreed that they faced similar problems. Wahl, who has been in the United States one year, and Leng, who has been here since 1974, said that foreign students are forced to adapt to a new culture. Wahl added that she has learned more about her family and friends than she ever thought possible.

Wahl said that she felt Indians were more friendly than Americans because Indians are more open and have "more time for other people." She said that the most noticeable transition is in the education the students receive.

Kittipaibulsak, a computer science major, said she spent one year in Oregon and three years in Ohio State University before coming to the United States this year. He said he came to the United States because it offered "more opportunity in the company sciences." Kottipalsak said the university was more than anything else.

Wahl and family and friends. Leng and Wahl said they also miss their native foods. Wahl added that she misses some Indian food but not the food that she likes. "I get sick of cooking," Wahl said. "The students agreed that as general they are treated well in this country, but "the university is not as good as some other universities."

The award was presented to the Ohio State chapter of Pi Mu Epsilon, the professional mathematics honorary society. It was the first ever presented.

Dr. De Pue has taught at the Radcliff Museum of Art and has written numerous papers and articles on the subject of foreign students.

Ray Wood's solo record

Review by Frank Johnson

This week brings a solo album, "Rodeo," from the Toledo Museum of Art's new artist-in-residence, Ray Wood. The album features a number of songs that have been written, recorded, arranged, and engineered by a single man.

Ray Wood has evolved a unique style of recording music that combines elements of country, folk, and rock. The result is a sound that is both familiar and新颖.

"Rodeo" is a 12-track album that features a mix of original songs and covers. The lyrics touch on themes of love, loss, and the American frontier. The production is top-notch, with clear vocals and crisp instrumentation.

The award will be presented annually.

"If we are going to improve the city we are going to need additional revenue," said Howard Rulter, chief of the city's planning department. "We must also deal with the problem of parking." Rulter said that the city is currently working on a plan to improve the city's parking situation.

Another aspect of Ray Wood's plan was to create a new type of parking space. "This could be accomplished by reducing the size of some of the lots," Rulter said. "We must also deal with the problem of parking." Rulter said that the city is currently working on a plan to improve the city's parking situation.

City awaits new federal building

A new federal building which will house the Department of Housing and Urban Development and other federal offices will be going up at Ninth and Main streets. U.S. Rep. Delbert L. Kirkman, Mo., the lowest of six bidders on the project, said that the building, with 13,300 square feet of usable area, is to be completed by the Terrydale Realty Trust Co., the lowest bidder. The building will be 10 stories high.

Dancers set concert

The University Performing Dancers will present their fall dance concert, "Shades of Expression," Friday and Saturday at 8 p.m. in the Auditorium. The concert, which is student produced and directed, will feature jazz, ballet and modern, as well as other forms of dance. Tickets are 25 cents at the door.

Heyne watches No. 1 hooters man was injured last year, earned in 1971 as a to day for that spot he role as Falcon goalie to Mickev Cochrane as he took over from unfamiliar sideline spot veterans. "I think I am just as good as Palmisano," said Heyne. "I'm up to the coach to pick the goalie for each game, and he (Mickev) has the best reasons for choosing whom he feels best.

Coach Cochrane has gone well with Palmisano for the last five contests and has told Heyne to keep his shape in case anything happens to Palmisano. Cochrane also said he is fortunate to have such an excellent replace ment in Heyne.

Heyne is keeping Palmisano on his toes for the starting spot, choosing who he feels best.
Haley's concern grows over backcourt.

At the beginning of the season, Haley was one of the key players for his team. His performance on the court was impressive, and he was considered a vital member of the team. However, as the season progressed, Haley began to show signs of struggling with the backcourt.

Haley had always been known for his agility and speed, which were essential qualities for a guard. But as the season went on, Haley found it challenging to keep up with the other players on the court. He would often get caught out of position, and his passes would be intercepted by the opposing team.

Haley's coach, Coach Johnson, noticed thechanges and spoke with Haley about it. "I think it's time for us to make a change," Coach Johnson said. "You've been working hard, but it's clear that your speed is not what it used to be." Haley was disappointed to hear this, but he knew it was true. He had been working hard to improve his speed, but it seemed that his days of being able to outrun anyone on the court were over.

Haley's teammates also noticed the change. "We need you to step up, Haley," their point guard said. "You're still a great player, but we need you to be more than just a shooter." Haley knew that he needed to make a change if he wanted to continue to be a valuable member of the team.

As the season progressed, Haley began to experiment with different strategies. He tried running more screens and using his size to create opportunities for his teammates. But it was clear that he was struggling to adapt to the new role.

"I'm not sure what to do," Haley said to Coach Johnson during a team meeting. "I feel like I've lost my ability to keep up with the game." Coach Johnson smiled and put a hand on Haley's shoulder. "It's okay," he said. "Everyone has their moments. But we need you to find a way to contribute on the court." Haley nodded and knew that he needed to find a way to adapt to his new role. He was determined to make a change and continue to be a valuable member of the team.
