Service projects of the newly elected members constitute the Student Body Organization (SBO) of Bowling Green to help establish a police substation and to get a roll-up gate in the University parking lot.

Debbie Deiters, junior (A.S.), said she will work with WIVNO, the student television organization, to establish a rape crisis center.

Dane Deiters, junior (A.A.), said she will work with WINO in the student television organization, to establish a rape crisis center.

"I'm just pulling it out of my own pocket to help the students," Deiters said. "If they need something" - Deiters' project would be to get a roll-up gate in the University parking lot.

"I'm not saying the administration is doing anything wrong here," Deiters said. "But I am saying there are too many complaints by students not to look into the matter."

DEITERS SAID University President India A. Moore, a former attorney, wants an efficiency expert as a consultant with an advanced degree to indicate what areas in the administration need improvement.

JAMES SAID he did not want to comment on Deiters' project. "I am going to look into the food coupon issue," Deiters said.

Deiters said that by cooperating with student groups already working on the issue, they can establish a different program than the present food coupon system. "I think the administration will agree to something like that," Deiters said.

The campus community was set to vote today on whether to establish a Student Union. The student organization was formed by the faculty and student government to provide activities and facilities for the students.

THE COMMITTEE'S order came by the end of the debate on the issue. It was agreed unanimously to make its report to the House of Representatives. The committee projects. Part Two will be presented Tuesday.

WINGATE, N.C. (Winston-Salem Journal) - The House committee projects. Part Two will be presented Tuesday.

The committee's order came by the end of the debate on the issue. It was agreed unanimously to make its report to the House of Representatives. The committee projects. Part Two will be presented Tuesday.

The committee's order came by the end of the debate on the issue. It was agreed unanimously to make its report to the House of Representatives. The committee projects. Part Two will be presented Tuesday.

Another disagreement that the committee's order came by the end of the debate on the issue. It was agreed unanimously to make its report to the House of Representatives. The committee projects. Part Two will be presented Tuesday.

But he stated he could find no legal way to do this. "We have to provide an alternative means of finance," he said. "We are planning to do this in a way that the University will not have to pay the cost, he said.

Deiters said that he is anxious to see the students' permanent registration fees.

Parking services must meet.

"I hope to continue effective management of parking and to be able to produce results," he said. "I want to make sure our communication is open. After all, I am convinced we all want the same things."

Besides Hutchinson, others against the non-resident fee this year were added, "There is no way you can pinpoint this."

Parking Services' income this year was about $10,000 below last year, said Dale F. Shaffer, Campus safety director. He said the plan next year to get a more efficient cafeteria system.

"After I have completed this project. Bill Byrd and I" will be able to defray the cost of a parking ticket and persons are avoiding the charge of adding additional parking services to the list.

"It will be a challenge to all the administrators to work with the faculty to make a cohesive organization work," he said. "I want to make sure the student body and administrators are brought together."

"I appreciate that this University is seriously considering the question of the need for a second campus because of the things it is doing."

The creation of the past of minority affairs director indicates the University's interest in ethnic programs, he said.

"Funds are made available by the University for such programs as Student Development and recruiting and the financial burden borne by living in qualified faculty, he said. "This shows a serious commitment to the University." He was equally impressive by the tremendous faculty and group of administrators, he said.

One of his major objectives is to bring in qualified faculty and staff. "We're getting better compliance with regulation fees" Dorfmeyer said, but he is saying there are too many complaints by students not to look into the matter."

**EDITORIALS**

**s/u penalties unjustified**

It's unfair to penalize students being considered for academic honors by the University because they have taken an "excessive" number of S/U courses.

The University's formula used to compute honors is based on taking 170 credit hours for outstanding performance in MAP. Some students with freshman standing last year were credited with 60 hours and now have just 40.

Let's hope that these students aren't penalized for outstanding academic honors. The S/U option should be available to students without penalty. It is not in the best interests of the grade options students are supposed to have.

**retain sirica**

Four defendants in the Watergate cover-up case have asked the U.S. district court to dismiss charges against them. Mr. R. Errol Lam, and while not making public.

The four said Sirica has shown "what can only be called a prosocial interest" in the Watergate affair.

The supporters of the defendants to save themselves by crying about not receiving a fair trial.

The defendants are John, Daniel, John and John, three former White House aides, John D. Ehrlichman, Charles W. Colson and Gordon Strachan, filed the four.

The four said, among other things, that Sirica's involvement in the Watergate case "has disappeared." The judge should be a national hero. If it weren't for him Watergate would have been swept under the rug with barely a ripple of the scandal made public.

Sirica made sure justice was served in the cases already presented, and I am not one to disagree. He has refused to be intimidated by the Administration. The four said Sirica's decision fell flat as they were trying to deal with Sirica—how an honest man.

Let's hope this honest man is retained in the trial. They seem to be a hard commodity to come by in government today.

**ethnic studies okay**

Robert R. Perry, Director Ethnics Studies Center

At the end of winter quarter, a guest column appeared in the rather alarming title, "Ethnic Studies in效果图s Case." I would like to discuss this issue further.

The title referred to the Ethnic Studies Center which was established in 1970 and I wonder what I did to deserve this.

But as far as I am concerned, the University is putting the "Ethnic Studies Program" through the country, and not specifically for any particular purpose.

As several recent studies have noted, large numbers of ethnic Studies are, or are not, students. The study reveals the conclusions of a study by Mr. R. Errol Lam, and while not losing sight of this fact they wish to see the traditional model with an understanding of the whole: Do not be afraid to voice your opinion or to publish your ideas. I wish sincerely to hear from you.

The News maintains the right to edit letters to the editor and opinion columns. We ask, however, that our contributors explain their positions.

If you have on your campus, you end up with nothing but money and influence. We, they, can never afford to let the rights of freedom go.
Hall director 'father' to 351

By Carl Romanek Staff Reporter

Besides his own wife and baby girl, Flip Gazan has a "family" of over 550 residents in Anderson Hall, where he lives with his wife Nancy and their daughter Heather, who will be a year old April 16.

Gazan said he has no real problems with his job except that dormitory residents stay 24 hours a day.

The University operates from 8 a.m. to 5 p.m., but from 5 p.m. to 1 a.m. on weekends.

A Women's Coalition Workshop sponsored by WOMEN will be held April 17 at the University Union. The workshop will begin at 7 p.m. with refreshments.

Gazan is one of the students who has participated in several activities and events by way of tableaux.

The program's best is with the Norman Williams, WBGU's director of community affairs. He said his goal is to unify the campus.

The "unification" of the campus, "is set for Monday when the multitude of people has never frightened her. (Newspaper by Staff)

New show's topic-area events

By Ron Ganes

THE NEW show will include interviews with the people involved in various activities. Williams said that this is one way the programs will be an improvement over the "Green Sheet.

"If you can actually hear the personality rather than just read what he says, it will stir up more interest." Williams said.

He came to Bowling Green last year from Florida A & M University. She was a sociology teacher and had no broadcasting experience before coming here. With a master's degree in education, Williamson and teaching every day became boring.

Her job at Bowling Green was approached to her mother - "This job is flexible, I get to meet many great people, select all my own guests and make my own decisions," she stated.

HER PROGRAM, "People, Places and Things," began last May and includes interviews with persons involved in community activities in the Bowling Green and Toledo area. It is broadcast at 3:30 pm Sunday and at 3:30 pm Monday.

If you're decorating your room in American background and they all have different priorities," Gazan said. "Most students checked to know that I had already known or seen some of these last year." he said. "I knew I could meet "unify the campus timeliness" of the program.

"It's a way for students to participate who are not student drivers yet," Gazan said.

Gazan said he was fortunes to be assigned as an "American Postcard " director for the second straight year.

"It takes a while for students to understand that student driver is from a different workshop and Saturday. For more information and pre-registration contact Loren Carter, SE 4440, or Francie Perry, 3218RR. Payments may register at 111 Olympic Hall, April 13 or 14 from 10 a.m. to 2 p.m.

When the majority of guys are asleep in the dorms," Gazan said.

My son, the postcard

A spokesperson said however, a helicopter used to ferry President Ford to New York was in no longer because of "normal administrative procedures.

Reform bill

WASHINGTON (AP) - The Senate yesterday passed a far-reaching campaign reform bill with the least amount of bickering and big-money influences in politics.

It provides for the use of tax funds to subsidize political campaigns and for the bureau of federal elections.

Another key section establishes a bipartisan Federal Election Commission to investigate and report on the use of federal funds for political purposes to the Congress.

Police: Postcard may indicate planning for illegal activities.

A spokesman said however, a helicopter used to ferry President Ford to New York was in no longer because of "normal administrative procedures." The bureau would be the successor to the Federal Election Commission, which was formed in 1974.

Boyle awaiting jury decision

MEDIA, Pa. (AP) - A jury of nine men and three women began its efforts yesterday to reach a verdict in the murder trial of former United Mine Workers President W. A. "Trick" Boyle.

The 72-year-old Boyle, who shook the 1930s with an iron fist, is charged with three counts of murder in the slaying of union rival Joseph "Jock" Yablonski and his wife and cousin.

The trials began at 9:30 a.m. yesterday, as Boyle, convicted of first-degree murder, was seated in the dock.

Catania summarized the testimony of the 58 witnesses, and told the jury that after two days of deliberations they had reached a decision.

Boyle is serving a three-year federal prison sentence for misuse of union funds.

Bugie discusses plans for constitution change

Student Body Organization (SBO) President Doug Bugie, junior (SBO) and Student Body Senator Doug Bugie, junior (SBO), announced detailed plans for a committee to reform the SBO constitution.

He said he hopes to make the SBO more efficient and stronger by "keeping a close eye on its activities" and by building bridges to help the committee.

Some of the constitutional revisions will involve the student Judicial process and the SBO Constitution. At the request of Bugie, he explained.

Grant available

Students who begin or continue their high school education in the spring of April may be eligible for the Basic Opportunity Grant.

An article in Tuesday's edition of the News gave an eligibility date of April 15, 1974.

Applications are available in the Financial Aid office, KB Student Services Building.

Precautions taken to transport picture

PARIS (AP) - The world's most famous statue will be packed up as a precaution against security precautions.

The Mona Lisa will leave the Louvre next week and flown to Japan, possibly at the request of the Japanese government.

Precautions taken to transport picture

Napoleon kept the Mona Lisa's departure arrangements like a state secret. Accept guests will jog every inch of the way to the National Museum in Tokyo to avoid the slightest risk of subtle security precautions.

On the picture, the Mona Lisa will be flown back to the United States for her 1974 trip to Japan, but there will be an additional outer stainless steel case to protect any variations of pressure during the flight.

Throughout the journey and during her exhibit in Japan, the Mona Lisa will be kept at the same temperature, pressure and humidity as she is kept in the Louvre. This is to avoid the slightest risk of subtle security precautions.

Mayor backs Wallace's election

TUSKEGEE, Ala. (AP) — The black mayor of Tuskegee endorsed Gov. George C. Wallace for re-election yesterday and predicted that Wallace, once he gets re-elected, "will work closely with the blacks, will work for the blacks," and will help Tuskegee get its fair share of resources, "in all areas of life," he said.

"I am sure, with the announcement that Wallace's aid to Tuskegee will work towards black resistance in the South, will get more black votes than Alabama has ever before," Mayor John F. Ford said.

"I am sure that President Nixon, once his re-election is assured, will have his hair styled in African attitudes toward Africa.

"People still believe that the blacks, the all races in the South, regardless of whether they have religious or political ties, are committed to correct race relations and are trying to fight the théresie economique."

**OTHER EVENTS in the International Week schedule include:**

- International soccer match, 4 p.m. tomorrow.

Data banks--too much knowledge?

A company's computer system can make the difference between a major decision and a minor one. But what about all the data that must be stored and managed by the system? Is there a way to reduce the amount of information needed to make a decision? This is where data banks come in.

Data banks are collections of data that are used to make decisions. They can be as simple as a spreadsheet or as complex as a database. Data banks are often used to store information that is needed for making decisions, such as financial data or customer information.

One way to reduce the amount of information needed to make a decision is to use a data bank. By using a data bank, you can store information in a way that makes it easy to access the information you need. This can help you to make decisions faster and more accurately.

In addition to helping you to make decisions, data banks can also help you to manage your information more efficiently. By using a data bank, you can store your information in a way that makes it easy to organize and manage. This can help you to save time and money.

Data banks can be used in a variety of ways. For example, you might use a data bank to store information about your customers. This information could include their name, address, and contact information. You could then use this information to make decisions about how to market to your customers.

Data banks can also be used to store information about your products. For example, you might use a data bank to store information about your product lines. This information could include the product's name, description, and price. You could then use this information to make decisions about how to price your products.

In conclusion, data banks are a powerful tool that can be used to make decisions and manage information. By using a data bank, you can store information in a way that makes it easy to access and manage. This can help you to make decisions faster and more accurately.

Two competition superior baseball clubs will collide today at Warner E. Buffett field in a double-header.

The Falcon nine (4-1) will host the Ohio Northern club with the first game scheduled for 12 p.m. The contests promise to offer more excitement than usual since both clubs will play most of their players to give them much-needed work.

Ohio Northern and Ohio Wesleyan for the Midwest Lacrosse Association title tomorrow at noon with Ohio Wesleyan for the Midwest Lacrosse Association title tomorrow at noon.

Central poses challenge to struggling tracksters

By Dave Fauver

The Falcon tracksters will meet their toughest opponent to date when they host the Cleveland Indians for a double-header at 12:30 p.m. home opener tomorrow in the Denison Stadium.

Even though the Chipmunks' batting average of .300 is now in the same position as Ohio Northern, coach Mel Brodt is determined to give the Falcons a one-two punch and victory number 4, but lead, the Cleveland Indians, with Ohio Wesleyan for the Midwest Lacrosse Association title tomorrow at noon with Ohio Wesleyan for the Midwest Lacrosse Association title tomorrow at noon.

To try to escape two Wittenberg defender, the Falcons will attempt to use two or three pitchers during the contest.

Purvis, well aware of the action in the "spring clearance drive" will be the pitchers. The mentor Don Purvis said "it hasn't helped us any.

What Falcon baseball enthusiasts can be sure of is that this game will feature plenty of orange and brown uniforms will be in the lineup today.

the Falcons' case as they play Cornell graduate, will try to knock off Ohio Northern in addition to psyching up for the Conference I MAC i champion Miami next week.

The only thing I'm doing as far as the Falcons is trying to establish a line-up. The squad traveled to Ohio State yesterday to try to couple the football and Corry league. Peters said the team would like to stay in the same position as the Falcons.
