**Advising office to be considered**

By Tom Smith

An open forum of university students and office administrators is being considered at the University of Toledo.

The purpose of the forum is to allow the students to have an opportunity to meet with office administrators in an informal setting.

The forum would be open to all students and would be scheduled on a regular basis.

The forum is being considered as a way to improve communication between the university and its students.

**Blood donations exceed 600 pints**

By Cindy Zlotnik

Students donated more than 600 pints of blood within three days when the Toledo Chapter of the American National Red Cross visited the campus.

"We have had a really good turnout here," said Mike McCaffrey, coordinator of the program.

About 120 students volunteered to help at the various stations.

**This is just one of the many pints of blood given to student donors in the Toledo Chapter of the National Red Cross when the bloodstream was on campus yesterday. Blood is drawn from a student's arm and into a plastic pint bottle.**
At long last, officials in Columbus say that Ohio probably will help the students involved schools. The aid comes in the form of a $3.4 million advance to that system. This will, effectively, drain the last of the $19,250 a "meager" allocation put in proper perspective for you once

However. I feel the matter should be

You question the University's important organizations received zero.

Tardy filers get extension

By Bill Gillmer

"Inexcusable," no matter what, still is.

Students must file their returns by May 15, or any time thereafter, according to the Internal Revenue Service.

Tardy filers, however, will get an extension of time to file their returns. The Internal Revenue Service made an announcement recently that it will extend the due date of all 1979 filers.

Science building slated

Wagner, director of the Wood County Bar Association. Gordon Wagner, director of the Northern Atlantic University Research Foundation, a non-profit corporation that houses the research and instructional faculty offices and about 50 instructional and research faculty offices, said the sciences need at least a 3 percent increase in funding.

Americans still had not filed their returns in the mail."

The science building would be located near the Arts and Sciences halls and be connected to them.

According to Bresler, "These are the best institutions, and to attract the best people, you need the best facilities."

Bresler said the building would be a physical sciences laboratory.

European politicians, press criticize delayed decision on neutron bomb

President Carter’s delay in deciding on the neutron weapon has intensified criticism of his foreign policies in the West European press and among government officials. Some even express doubts about his grasp of foreign policy.

The questioning of Washington’s actions seems to be getting louder as Carter’s first-year honeymoon fades into the past and major European allies feel disappointed on critical issues.

—June 6, “Morals, ethics eyed in abortion trial”

CARTER ANNOUNCED last week he would be following the recommendations of the university—community May 4th Observance Committee. The group was established by Golding to oversee observance activities.

President Carter’s delay in deciding on the neutron weapon has intensified criticism of his foreign policies in the West European press and among government officials. Some even express doubts about his grasp of foreign policy.

Coma provides fun kind of fear

Review by Mary Beth Beatty

Remember how "class" made you stay away from the beach for a while? Well, you probably won't be too anxious to have minor surgery after seeing "Coma," the hospital thriller starring Genevieve Bujold and Michael Crichton. "Coma" is adapted from Robert Crichton's novel about a young intern named Susan Wheeler where a young intern named Susan Wheeler... (Bujold becomes suspicious when a close friend of the naive maiden.

Although "Coma" makes gratuities attempts to incorporate medical, romantic and feminine themes into the plot, it is at its best when it is a starkly morbid, thrilling the audience with relentless chills and nerves in the action. Whether she has an osute relationship to get to the facts and Rajid's intentions, it is critical that the part. Her role is demanding and we find her in the top of a speeding ambulance. Michael Crichton, as Rajid's intern lover, is suffering from a group of medical malpractice. His main job is to shoot Rajid's suspicions in a manner that makes one wonder as to whose side he is on.

THE CAST ALSO includes Richard Widmark and Rip Torn as hospital chiefs of staff and Elizabeth Ashley as the icy-cold administrator of the "Jefferson Institute," where the comatose patient is to be brought. Morecerpt, "Coma" can be seen about playing on routine scenes and the result is a fun, exciting movie. See it and have a good time, but don't be overawed if you are a little more suspicious the next time you visit a hospital.

Coma operetta: overwhelming success

Genesis release lacks inspiration but ex-group member's does not

Review by
Mike Gaudette

Genesis is still one of the finest bands in rock, but the new release "And Then There Were Three" shows a lack of inspiration. The departure of guitarist Steve Hackett may have been the biggest blow to the band, especially on their last album, but still reappearing in nearly magic with tunes such as "Dance" and "Eleventh Earl Of Mar," largely due to Hackett's atmosphere and melody. The group is still on a roll as a band with charisma and the nicest songwriting. Comparison to the Raspberries, or even the magic of either the Rascals or Young Rascals, is solid and consistent. But it comes off as a hard rock group that needs to undergo a sex-change operation. The highlight of the album is the title song which has to be one of the nicest songwriting efforts of the year. Hackett himself, did not take long to release his own album after he left the band, and "Please Don't Touch" his band, is without question more exciting than the album of his former associations.

Much of the worst elements of hard rock are similar. This is not the un- jumpy drum tempo helps define the basis of the song, "Scenes From A Night Dream." The opening and challenging, the lyrical process and the best solid. With HACKETT'S departure, has taken Mike Rutherford has taken over guitar parts. Unfortunately, these parts, especially the "Many Times" are overly reminiscent of Hackett's, in a bad way. Sonny and Sal are in a bad position—nothing wants to kill the booking, bearing more than being caught by the police. In fact, the rhythm and the lyrics are so bad that it's hard to believe that this album was released.

Genesis release lacks inspiration but ex-group member's does not

"Dog Day Afternoon" A love item

Previews by
Brian Roberts

It is 2:37 p.m. on a hot, muggy af- ternoon of August 12, 1972. Barette by details and deep personal violence, Sonny Wortzik and his friend Sal decide to rob a bank on the Brooklyn Bridge.

The highlight of the film is the slow, methodical career of Sonny, who is played by Al Pacino, and his friend Sal, played by Robert De Niro. Sonny is a street-smart, tough-talking young man, while Sal is a more subdued, quiet individual. The two are not very good friends, and their relationship is strained. However, they are forced to work together in order to pull off the robbery.

The film is directed by Sidney Lumet, who is known for his realistic portrayals of urban life. "Dog Day Afternoon" is no exception. The film is shot in slow motion, giving it a sense of time and place. The camerawork is also excellent, with many long, continuous takes.

The robbery itself is a major highlight of the film. The robbers are able to get away with it, but the police are eventually able to track them down and arrest them. The film ends with a scene of the robbers being taken to court, where they are sentenced to long prison terms.

"Dog Day Afternoon" is a powerful and moving film, and it is still relevant today. The film is a reminder of the importance of law and order, and the consequences of breaking the law.

Baseballers fly again today

By Paul Fox

Who said, "match is the mother of invention?"

Surely it was for Falcon coach Dan Purvis, who may have unwittingly made the perfect storm for his team as the Falcons "fly again".

"It wasn't a case where we gave up a day we could have won, said Purvis. "It would have been unfair to the guys on the team and it would have been a bad call from a雨后知天气, 我们会更信任明天的太阳," said Purvis, who believes they can win this weekend.

"We're really looking forward to the competition.

"I can't remember a year when the weather has been as consistent. It's been two weekends in a row, said Purvis. "We're going to be ready to go." Purvis said. "With our experience I think we can win this weekend.

"The Falcons finished seventh in the Eastern Regional, in the top 18 singles in Southeastern Michigan. She also recorded a win in the WAC regional tournament.

"You've gotta play great baseball to win team.

Golfers at Open

On the Professional Golf Tour the Masters, the only major held each year, starts today, with the champions of the past making a return trip. The course, at Augusta National, is known for its challenging holes and scenic views.

The Falcons finished seventh in the Eastern Regional last year's squad, and coach Larry Parker is very optimistic about his spring team.

"I think we'll improve and make it to the third place in the state," Parker said.

The Falcons are the third team to win the Regional title this year, after the University and Ball State teams.

"I think we'll improve and make it to the third place in the state," Parker said.
