Area mayor indicted for wife's murder

by Don Lee

The mayor of a Northeastern Ohio village was indicted yesterday by a federal grand jury on charges of conspiring to extort money from a businessman in exchange for promoting his business.

Robert Maurer of Greenbriar Inc., until they took action to correct a hot water problem there.

The 'student slums' of BG University due to an extended power outage.

Jim, who declined to offer his last name, was laid off from his job in Detroit and said he needs to make some money to travel to Albuquerque, New Mexico, where a job doing maintenance work at an apartment complex waits for him. He spent about two hours in front of Haven House Apartments this week trying to find work to make the money before heading to Denver to pick up his family before the journey.

Minority hiring at University urged by group

by John Mead

People Against Racism issued a statement yesterday calling for the University of Ohio to adopt a more inclusive hiring policy.

"At this point, we believe we have enough evidence to warrant action for the death penalty," she said.

Lach's wife, Elaine, was driving on Ohio 81 in Lake County, in northern Wood County, when her car collided at about 9 p.m. She was severely injured and died about 2 hours later in St. Charles Hospital, Oregon, a few hours after the accident.

Lach's arrest was made in an apparent appearance at the county courthouse during a hearing on the case yesterday morning. A member of Lach's family reportedly told investigators that Lach had built an object resembling a pipe bomb.

Legal action may expedite house repairs

by Greg Corwel

There is a nagging problem around the apartment. The wiring is bad and the basement floods.

"We request that the University, under the leadership of the current president of Bowling Green State University, adopt a method of recruitment that 'demonstrated ability in recruitment of minority applicants, in addition to guaranteeing compliance with the University's Affirmative Action (department) policies,'" he said.

Frederick, associate professor of economics, said of the fact the statement had to be issued, "It's a sad commentary on our Affirmative Action (department) when we don't see it done correctly a century later."

The statement on the University's policy of hiring, which includes the phrase "demonstrated ability in recruitment" in its definition of "affirmative action," was adopted by the Park student body in 1985.

The statement also includes a provision that "hiring of a candidate's ethnic status has been found to have resulted in the advancement of an individual's employment at the University."

Reasons sought for Cain’s dismissal

By Dr. Paul Olscamp or to Dr. Olscamp

To: Dr. Olscamp

From: Dr. Paul Olscamp

Subject: Cain's dismissal

Dear Dr. Olscamp,

I hope this letter finds you well. I am writing to you to express my concerns regarding the recent dismissal of Cain from your university.

I understand that Cain's actions were deemed inappropriate and that this decision was made after a thorough investigation. However, I cannot help but feel concerned about the implications of this dismissal on the university's reputation and the overall climate of the campus.

Cain was a respected member of the faculty and had made significant contributions to both teaching and research. His dismissal has caused a great deal of unease among students and faculty alike. I am worried that this decision may set a precedent that could have negative consequences for future faculty members.

I believe that it is important for the university to communicate clearly to students and faculty about the reasons for Cain's dismissal. This will help to foster transparency and trust among the campus community.

I hope that you will consider these points and take appropriate action to address any concerns that may arise.

Sincerely,

[Your Name]

"Atom-smasher' may locate in Ohio

by Julie Wallace

If a lid is the Legislature is approved by Congress and the U.S. Department of Energy, Ohio would become a leader in the state of the century. The General Assembly, the Governor's office and Ohio State University are preparing the necessary legislation to sit at either state taxpayers. However, the state has never referred to an "atom-smasher." The project has often been referred to as the Superconducting Super Collider (SSC) in Ohio. It has been described as the world's largest high-energy physics laboratory that has been likened to the world's largest physics research center.

Jeff Snick, coordinator for the Ohio Technology Transfer Organization, said the SSC "is a billion-proton project that could accelerate protons to high rates of speed. They would be made of small particles. It has the ability to accelerate protons into the small particles that cell into the particles. Therefore, it would be capable of achieving the speeds necessary to split the proton into the small particles. The deeper the deposit, the more the cost is increased. The site was chosen because of the extensive underground deposits in the area. Snick said, "The costs of the project is increased because of the potential pay-offs to any state that doesn't take the lead on physics research, we have to be ready to protect the underground structure." The facility would be a 52-mile circular track built underground into the bedrock deposits in Ohio. Another benefit of the project would be the development of industries based on physics would be the most prominent development.

EXPLAINING THE SSC, Wellman said the project would by obtained by easements, where we can acquire the land when we receive it, our country agrees to follow certain guidelines designed to protect the underground structure. "Basically, the above-ground construction will consist of several observation buildings," he said. "Other than that, the majority of the construction will take place underground, leaving the surface of the land undisturbed." The "duty" proposed, he said, involves expanding the fields. "We're not sure if we want Ohio to be attractive to the government, we have to be ready to protect the underground structure."

CONCERNING LAND acquisition, Wellman said as much as 50 percent of the territory scheduled to be used for the project will by obtained by easements, where the farmers can continue using the land if the facility is to be accepted. "The federal government wants assurance that we can accept the land when needed; if we want Ohio to be attractive to the government, we have to be ready to protect the underground structure."

Wellman said as much as 50 percent of the territory scheduled to be used for the project will by obtained by easements, where the farmers can continue using the land if the facility is to be accepted. "The federal government wants assurance that we can accept the land when needed; if we want Ohio to be attractive to the government, we have to be ready to protect the underground structure." The depth of the deposit was an important factor when the site was chosen. "Basically, the above-ground construction will consist of several observation buildings," he said. "Other than that, the majority of the construction will take place underground, leaving the surface of the land undisturbed." The "duty" proposed, he said, involves expanding the fields. "We're not sure if we want Ohio to be attractive to the government, we have to be ready to protect the underground structure."
Students capture first, third in creativity contest

Health Center reports quality, low-cost care

For many students, the thought of going to the Student Health Center for medical reasons is more frightening than the ailment itself.

Although employer of the Health Center believes the center provides quality care, students commonly express "horror stories" that they have had here for service to comment about discourteous staff members and misdiagnoses of problems.

Lori Mert, junior art history major, said that she had problems with large lines being long and has heard about people who have had worse treatment. "I've heard a lot of problems about women who go for strep throat and end up being tested for and grilling about being pregnant."

Another student commented about an improper diagnosis. "I had pleurisy, but they mis- diagnosed it," said Tim Frutah, sophomore journalism major. "They sent me to the hospital and it was all wrong. But Dr. Joshua Kaplan, director of the center, said students should not be afraid they will receive inferior care from the center.

KAPLAN SAID the center provides high quality care and a variety of services of which students should be aware.

"If they (the students) have a problem with the quality of their care, or if they just feel the doctor is not explaining or treating them correctly, they should be able to change doctors or, if a problem is serious or an emergency, they should be able to contact 911," he said.

"In addition, services include general medical care; a women's health center: a pharmacy counseling; an ear, nose and throat clinic; and a dermatology clinic."

Kaplan said since the staff of five physicians does not include a radiology assistant, no X-rays are performed.

The Student Health Center also serves as a contact point for students who may need special services. "We are in that position ourselves. Students are able to refer those students to area hospitals where help is available."

"If there is a service offered by the center is less expensive than the health care system in which educational and career advancement are the rule, not the exception. The gold bar on the right means you command respect as an Army officer. If you're earning a BSN, write: Army Nurse Opportunities, P.O. Box 7713, Canton, OH 44705. Or call toll free 1-800-USA ARMY.

Professional plays Othello

Roger Robinson returns to stage at University after 17 years

by Jared O. Wadley

Last fall in Cleveland, the acting chairman of the theater department at the University asked Roger Robinson to direct and to play the lead in the University's 1987 Shakespearean production, "Othello.

Tooght, Robinson, a New York resident who has been acting for 25 years, will return to the University's Eva Marie Saint Theater stage to perform again.

Seventeen years ago, Robinson performed "Othello," which was written by his Cultural Arts Program. In the play, Robinson was one of the professional actors, including actor Jared O. Wadley of the University's Eva Marie Saint Theater and 25 years ago. Robinson said he has directed professional in several plays, but he decided to work with professional actors, not professional actors, away from the classroom.

"I want to do a production away from the pressures of a professional situation," he said. Robinson said he wanted to be free to incorporate some of his ideas into the play because he had done "Othello." Robinson has also performed in many plays, Broadway productions, and television shows, some of which are listed in the list below.

THE ACTOR began his career in New York in all broadway plays called "Walk in Darkness." He said he studied under Lloyd Richards, the original director of the 1959 production of "Raisin in the Sun." Richards called "Walk in Darkness." He said he had enjoyed working with the students, but he had to be more articulately with them.

"I had to spell many things out to them because their references are limited," he said. "They're young people. They have to have access to competes in the open market place where they can define and shape their ideas because they have been deprived of this knowledge in acting with 50 students in the play. He said he had enjoyed working with the students, but he had to be more articulate with them.

"They're young people. They have to have access to compete in the open market place where they can define and shape their ideas because they have been deprived of this knowledge. The kids have been deprived. They're eager to learn, to understand, and to apply, and I have given very few of them, he said.

"It is tremendously com- plex. Many are called; few are chosen," he added. Robinson said he will miss the students when he returns to New York to work on his other projec-

Walkout ends in Columbus

COLUMBUS (AP) — City bus drivers and mechanics returned to work yesterday after a one-day walkout against the Central Ohio Transit Authority. COTA spokesman Jeff Gray said the drivers were threatening to go on strike at any time.

Defendant blows up self

The court is seeking information about a man who has blown up himself. The man, identified as John Doe, was arrested yesterday after he was seen walking around the area with a bomb.

Lt. governor berated for Nigeria comment

DAYTON (AP) — Lt. Gov. Paul Leonard's remarks about Nigeria are causing some concern in the local community. Leonard, who is on a trade mission to Nigeria, has sparked controversy with his comments about the country's government and its handling of the crisis in Biafra.

Uranium spilt on Cincy plant

CINCINNATI (AP) — A powdered substance containing radioactive depleted uranium was spilt yesterday at a building at a brewery plant. The substance contained 236 pounds of depleted uranium, which contains about 6.5 percent of the radioactivity of natural uranium.

The drum's contents spilled when a forklift operator at the plant accidentally knocked the drum over. The drum contained about 6.5 percent of the radioactivity of natural uranium.

Shark spill closes Toledo exhibit

TOLEDO (AP) — A shark exhibit at the Toledo Zoo was closed yesterday after a shark injured a keeper. The shark, a lemon shark, was injured when it got its fin caught in a hose and was unable to swim.

The two lemon sharks in the tank were rescued. The tank was closed until the shark could be treated.

Gray had threatened suicide. The court is seeking information about a man who has threatened to blow himself up.

Sauter said he planned to file two unfair labor practice charges with the state's Industrial Commission.

The two counts of selling LSD and marijuana possession were reported after the tank's contents spilled. The tank was saved by a keeper.

The two lemon sharks in the tank were dead by the time the sharks were rescued.

A zoo keeper suffered abrasions to his face and another keeper was injured when he was cut by a piece of glass from the fish tank.

The shark's injuries were not life-threatening, but it is uncertain whether the shark will survive.

The sharks were rescued after they were reported to be injured.

**NATO considers Gorbachev’s proposal**

By Bryan Brumley

The progress on intermediate nuclear force, or INF, confirmed recent signals that arms control disputes, such as recent accusations of Soviet spying, are important enough to override other bilateral disputes, such as recent accusations of Soviet spying on U.S. diplomats.

**Gorbachev** this week reiterated his opposition to visiting the United States, as agreed at the Geneva summit arms deal. And Reagan, battered by the Senate, appears eager to reach the first arms control agreement of his presidency.

After three days of talks in Moscow between Defense Minister Eduard Shevardnadze, said an agreement was "close at hand" to sign an agreement to match the Soviet shorter-range missiles.

The STALEMENT over medium-range missiles noted in the Nov. 15, 1981 to the deployment of Soviet intermediate-range missiles, weapons with a range of 300-600 miles, capable of hitting Western Europe from bases in Czechoslovakia and East Germany.

At the same time, Moscow initiated its short-range SS-13s with new missiles, the SS-22 and SS-23, with ranges of 200 and 250 miles, capable of hitting Western Europe from bases in Czechoslovakia and East Germany.

The short-range missiles, if deployed in force, would remove all its SS-20s from Europe.

**The Breakthrough** was Gorbachev’s promise to enter negotiations aimed at eliminating, within a year, shorter-range Soviet missiles, SS-13, SS-22 and SS-23.

The United States has no comparable weapons, and the Western alliance has agreed they be part of an INF deal. The Soviet Union previously insisted that they be considered separate from the INF talks and that the United States had not been involved in negotiations that it considered to be separate from the INF talks.

The United States would not deploy its missiles if the Soviets dismantled their INF system.

The Kremlin refused, and the U.S. and the United States would expect arms control negotiations to enter a new phase.

At the same time, Moscow initiated its short-range SS-13s with new missiles, the SS-22 and SS-23, with ranges of 200 and 250 miles, capable of hitting Western Europe from bases in Czechoslovakia and East Germany.

The short-range missiles, if deployed in force, would remove all its SS-20s from Europe.

**The HONDURANS air force is building around a few of the French Super Mirage MiG light bombers first flown in the late 1950s, which it sought to update their air fleet.

In all, Honduras expects to receive 18 of its 25 U.S.-built B-52s over 10 years, and has agreed to buy 25 more short-range missiles in the near future.

**The defense had argued that** the true offender.

Falcon softballers sweep Detroit

Win streak now at four

by Karl Smith

sports editor

It is not a streak like those legends are made of. The Falcons aren't looking to build a legend. She's just looking to get the Bowling Green softball team on the winning track.

So the Falcons were quite happy to see their team enjoy its modest winning streak as they prepared to face Detroit yesterday.

"These are big wins for us, as this is our biggest winning streak around for them," Davenport said.

"I hate to be taken out of the game by a call. It turned the scoring opportunity. That was a critical call," he said. "I thought we might have been bunted and complemented after that."

Nonetheless, the call stood and Detroit's a good hitting club. UD coach Nick Stann said the entire contest hinged on one call.

"The second game, Bowling Green's Amy Lienhard applies a tag to Detroit runner trying to steal second. She was out, and the Falcons wasted little offensive support in the night cap."

Falcon pitcher Michelle Clagett allowed four runs on 11 hits. Meanwhile, the offense pounded through it, tallying two runs in the second, then three to start the third with a triple play.

Unfortunately, for the Titans, they didn't receive such defensive support in the night cap.

The Falcons wanted little defensive help as they pitched a no-hitter. Campbell and Joalyne Anderson are the only ones to score in the game-winning RBI. But the Falcons wasted little, tagging in Anderson with the double play.

The Falcons improved to 10-14 as they extended its modest winning streak to four games with a 6-2 victory over Detroit yesterday.
