Allgeier gets master prize

by Catherine Nieslab

In his campaign for Undergraduate Student Government president, Tim Peterson said that Allgeier would be "the true students' choice" for the position. So, it was no surprise that when the voting was over, Allgeier had won. The 682 vote down divestment act, according to Perry, was "if it were really close, we wouldn't take a..." because "this is part of an overall program to improve parking and lighting on campus." Allgeier's...
Representative sample needed

T o divest or not to divest — this has been the question. Out of 1,391 students responding, 493 answered "no.

With a margin of 72 students voting for implementation of the Undergraduate Student Government, which asked students whether the Bowling Green Foundation should or should not divest, may become the first official organization on campus to do so.

But to make this issue valid under the USG constitution, the student government must have needed to reach the required 10 percent of the student body.

Even so, the general assembly will be voting to take immediate action during their Thursday meeting and are expected to vote according to their perception of the student voice.

Issues of various groups on campus voting on divestment resolutions and circulating petitions in order to reflect their perceptions of student opinion on divestment, an accurate and representative sample of the student voice on this issue should be taken.

Because these groups are working to guide the Foundation's decision on the divestment issue, the group holding a representative sample of the student body should not be taken lightly.

Mr. John R. Gilmour, for example, would likely "vote" for Paul Gillmor, a candidate who has advocated for divestment.

Mr. Paul Gillmor, if asked his opinion, would probably respond by stating he might vote for "no." He probably would not respond, however, if Mr. Gilmour, the other candidate, asked him to respond.

The results of this non-representative sample needed would be incorrect due to Mr. Gilmour's influence on the student body.

As stated by the USG vice president, Jim Perrry, "This may, as far as the foundation is concerned, close their minds on the issue."

But should their minds be closed before all the facts are presented?

Foundation president Ashel Bryan said the vote, as currently stands, will be taken into consideration.

Therefore, as USG guidelines dictate, 10 percent of the student population, as decided by findings of this letter, are presented to the Foundation.

Letters

Phone survey biased in favor of students

I received a phone call earlier this week by Dr. John Purkiss, a research associate, who asked if I wanted to participate in a survey regarding parking on campus. I was asked several yes/no questions, which I believe are not appropriate to survey. The facts before writing to the student body.

He informed me that the student government was surveying students to get opinions of students who have not been surveyed before.

He then said, "Your participation will help us determine whether we need to make plans for future parking lot expansion."

I was then told that "Dr. Purkiss" was a part of the student government, and I should be satisfied with the results.

He then asked if I knew where exactly the parking lots are, which I could have answered "yes," and then asked if I would provide a 5 percent increase in parking lot efficiency.

I was told that this information would help the student government in the future and that I should feel free to contact them with any other questions I had.

I do not believe that this is an accurate reflection of students' opinions, and I am concerned that the results of this survey may be biased in favor of students who have not been surveyed before.

Furthermore, I am concerned that the student government is using this survey to determine whether they need to expand the parking lot, which is not the purpose of the survey.

The survey questions were asked in a biased manner, and I do not believe that the results will be accurate.

Therefore, I believe that the parking lot expansion should not be based on the results of this survey, and the student government should consider other factors when making decisions about parking lot expansion.

Dear Craig: Reformation is needed

I have been a regular reader of the BG News for 12 years, and I have noticed that the newspaper is not what it used to be. The newspaper has become more biased and less readable.

I would like to see the newspaper improve its quality and become more professional. I believe that the newspaper should focus on providing in-depth reporting and analysis rather than relying on sound bites and sensationalism.

I would like to see the newspaper hire more journalists who have experience in investigative reporting and who are passionate about their craft.

I believe that the newspaper should also consider changing its format and design to make it more visually appealing and easier to read.

In conclusion, I urge the newspaper to take steps to improve its quality and become more professional. I believe that the newspaper has the potential to be a respected and influential voice in the community, but it must take steps to improve its quality.
AIDS easily prevented

by Beth Church

Although Ohio will report over 5,000 cases of AIDS by 1991, the chief of Ohio's Bureau of Preventive Medicine said he is not worried the disease will ever reach epidemic levels. Dr. Thomas Halpin said, during a press conference Friday, that the disease is preventable.

AIDS is caused by the human immunodeficiency virus, which infects the immune system and leaves the body vulnerable to infections and other diseases. People who do not have AIDS can still get these infections, so victims are often described as "AIDS patients." Halpin said the disease is preventable, if the public heeds the advice. Halpin said college campuses are one of the places in high risk for the spread of AIDS, because of the young, sexually active population. "This virus, which is a highly infectious virus, is spread by exposure to body fluids," Halpin said. Halpin said he does not expect the disease to get better at treating it.

"New medicines can clear up the infections, so victims are able to go on and live normal lives for at least a little while," he said. Halpin suggested using a safe sex practice, especially monogamous, to decrease the exchange of body fluids. "There have been situations, though, where people did get AIDS even after using a condom," he said. Halpin also suggested using a spermicide, especially monogamous, to decrease the exchange of body fluids.

To cut down on the risk of contracting AIDS, Halpin said people can take precautions. He said, "AIDS is very, very easy to prevent," Halpin said, speaking to both students and area health-care providers. "Just a few people can be protected, if they know the facts." Halpin said college campuses are one of the places in high risk for the spread of AIDS, because of the young, sexually active population. "This virus, which is a highly infectious virus, is spread by exposure to body fluids," Halpin said. Halpin said he does not expect the disease to get better at treating it.

"New medicines can clear up the infections, so victims are able to go on and live normal lives for at least a little while," he said. "There have been situations, though, where people did get AIDS even after using a condom," he said. Halpin also suggested using a spermicide, especially monogamous, to decrease the exchange of body fluids.

"I would congratulate the student vote," said William Sulian, editor of the campus newspaper. "I think they're doing their job. I think they're doing it right." Perry and Bryan disagreed, saying the students need to educate themselves about the issue. "I would congratulate the student vote," said William Sulian, editor of the campus newspaper. New class to study fatal disease in fall

by Beth Church

A new course to be offered next fall will give students a chance to learn about AIDS, according to the dean of the College of Public Health.

Dr. Perry Hutton, president of the college, said the course will cover legal aspects of AIDS. "We want to focus on all the aspects of AIDS," said Willis, "not just the medical part." Willis said the course will be designed to give students a general understanding of AIDS. "We want to give students a general overview of the disease," she said. Willis said the course will be designed to give students a general understanding of AIDS. "We want to give students a general overview of the disease," she said.

Disraeli Hutton, president of the college, said the course will cover legal aspects of AIDS. "We want to focus on all the aspects of AIDS," said Willis, "not just the medical part." Announcing the Fifth Third challenge. Here's the deal:

Six Months- No Monthly Service Charge.

Open a new One Account® and you'll enjoy the benefits of the best checking plans - free personal checks, online account access, and much more. And, when you open any checking account between now and May 31, 1988, you'll be able to open it six months without the regular monthly service charge.

A Credit Card With No Annual Fee.

In addition to the convenience of a checking account, you can get a Visa® or MasterCard®, upon qualification, with no annual fee in 1988. Get a Visa® or MasterCard®, upon qualification, with no annual fee in 1988.

FIFTH THIRD BANK OF NORTHWESTERN OHIO

Putting People First.

The Tradition Continues...
Council OKs reservoir bid

by Austrian

City Council took another step toward the goal of finding a new location for the Maumee River water treatment plant when it approved a request yesterday for a 30-day public advertisement for bids. The advertisement is required before construction can begin on the plant.

A formal resolution authorizing the city to advertise for bids was approved by a 7-0 vote. The resolution comes after the City Council's approval last May of a consultant's report that recommended a new site for the water treatment plant.

The new site, which is located on a 300-acre tract of land about a mile west of the current plant, would be more suitable for industrial uses than the current site, which is located near the Maumee River. The new site also would be closer to the city's population centers, making it easier to transport water to the city's residents.

The City Council's approval of the advertisement for bids is expected to be the first step in the construction process for the new plant.

City Manager William Drivek said the City Council's approval of the advertisement is a positive step toward the construction of the new plant.

The new plant is expected to be completed by 2024 and will be able to provide the city with a 30-day supply of water in case of an emergency, Drivek said.

"This advertisement is the first step in the process of finding a new location for the water treatment plant," Drivek said. "We are working with consultants to determine the best location for the new plant, and we hope to have a site selected within the next six months."
Blotter City

A police investigation of a assault on a local bar last Saturday night revealed that a group of students had gathered at the bar and began to吵闹.

The investigation, which is still ongoing, has not yielded any suspects.

The campus police are urging students to be vigilant and report any suspicious activity.

Anne Johnson, a sophomore at the university, was allegedly attacked by a group of students after she refused to join in their drinking.

The university has announced that additional security measures will be put in place to prevent such incidents from occurring in the future.

In other news, a disturbing incident occurred on campus last week.

A student was confronted by a group of individuals who demanded money and threatened violence.

The student was able to escape unharmed, but officials are still investigating the incident.

University officials have been quick to reassure the student body that the campus is safe and measures are being taken to ensure student wellbeing.

The university encourages anyone with information to come forward and assist in the investigation.
Clinic lets kids feel special

Student volunteers make Saturdays fun for children, family

Teresa von Deylen, junior special education major, gives her partner, Kurt, gentle encouragement as he contemplates a plunge from one of the low diving boards at Cooper Pool.

Michelle Mugnano, sophomore physical therapy major, applies a soothing touch to Barry, 12, as they relax in the Andrews Pool whirlpool.

Ben Snyder knows he is special. As he grasps a bowling ball against his stomach, he confidently strides to the steel ramp that will send the ball down the hard wood alley.

"Watch me," he says to his partner Jeff Shokles, senior sports management major.

With a look of determination and the aid of Shokles' arms around him, he pushes the ball down the ramp and rolls toward the ten pins, droning a methodical roar.

"Oh no, you're going to get them all, Ben," Shokles says. The 11-year-old watches with anticipation as the black ball knocks over eight of the pins.

But that is good enough for him. He throws his arms around Shokles in triumph and plants a kiss on his cheek.

Snyder and Shokles are one of 60 pairs of University students and handicapped children and adults who participate in the Saturday Morning Recreation Program every other week.

The participants range in age from four to 27, and have a variety of disabilities: spina bifida, blindness, hyperactivity, malformed hands.

Likewise, the students have as many differences. Their majors range from special education to marketing.

Yet when they come together six times during the semester, the differences are unimportant. Meeting for a few hours on these Saturdays, the partners partake in swimming, ice skating, basketball and bowling.

However, their interaction does not end there. According to a student coordinator Margo Elias, a lot of the students call their partners during the week to see how they are doing.

Many of the students meet with their partners and their families after the program for a cup of coffee in the Union. Some even babysit occasionally.

"The most unique thing about this program is it involves not only the students and the children, but the families as well," said Dolores Black, director of the program.

Black, associate professor in HPER, became involved in the program in 1975, when she filled in as a volunteer for a friend. However, at the end of that year, Betty Kratz, who was the director, retired.

But Black decided to take over, rather than see the program end.

Since then, the program has grown from eight visually impaired children to the 60 young people and adults it now includes.

"We now are getting more teenagers than younger kids and it shows that there are no limits to socialization for the disabled," Black said.

By not allowing any barriers to get in the way of the disabled participants, the program helps in this socialization.

If a child cannot ice skate or is physically unable to do so, he or she is strapped into a chair and pushed around the ice by a partner.

When a bowling ball is too heavy, the partner walks the child down the alley so the pins are in reach.

"You can do the same thing a hundred times and it's as much fun that time as it was the first," said Carrie Fay, junior special education major. "They really appreciate it and they say thanks with smiles and hugs."
The winners of the Undergraduate Student Government 15 at-large representa-
tive positions are, in order of number of votes received: Linda Popovich, junior political science and econom-
ics major, received 156 votes; Brian Murphy, freshman psychology major, 146 votes; Christy Belknap, sophomore English and provi-
ence major, 130 votes; Rich Cole, sophomore finance major, 124 votes; Kevin Moore, sophomore business major, 116 votes; Rodney Childs, junior business major, 108 votes; Charles Hillman, sophomore business major, 103 votes.

USG elections.
Continued from page 1.

Callie McCleary, sophomore psychology major, received 25 votes; Mark Brown, sophomore finance major, 20 votes; Beth Talent, sophomore English and Providence major, 20 votes; Matt Peterson, sophomore accounting major, 18 votes; and Chad Peterson, junior business major, 17 votes.

Peterson said he will also be working to put in a "round table" plan for students. A list of contacts from all campus groups will be made available to the students in order to give them ideas for over the summer, and to keep the groups "informed and motivated," he said.

Peterson said he hopes to have completed some student housing before the semester concludes, so each student group and "round table" committee will be given by the student body a list of things that they need to stand behind our new president — Tim Peterson," Kreienkamp said.

"This is an excellent candidate. "The election is every day. We as students are the ones who have to stand behind a president," Kreienkamp said. "We have to stand together in a new government."

Bongers, Latimer star in scrimmages

Mark Bongers and Cully Latimer made the most of their first stringing roles in Bowling Green's spring football action.

Bongers, replacing wide receiver Dan Maund who was running with BG's track squad, and Latimer, taking the injured nose guard Steve Rick's spot, played in the second scrimmage, as did several other players. Latimer played in both one of which went for 10 yards and a first down late in the third quarter, while Latimer, listed at linebacker last season, played with the first defensive oil and replaced three quartermback sacks.

"We're experimenting with several new plays," head coach Moe Ankney said. "It's a little difficult because of the time we have left, but we're trying to fine tune some things for the day." Latimer added that he was all over the place, adding "We'll take another look at him on film, but he was all over the place today."

Mike McGee rushed for 95 yards on five carries, including a 55-yard sprint for a touchdown - his first of the spring. McGee had three touchdowns. He capped the opening day with a five-yard TD pass to fullback Ron Viscounte.

Quarterback Ted Dackin was 10-of-19 for 106 yards and one touchdown for the Falcons. He also had one of three interceptions, which included a couple bad passes and an incomplete.

The line also did a good job opening up the running game. Tailback Mike McGee rushed for 66 yards on five carries, including a 10-yard sprint for a touchdown. Dackin said that McGee has had two good scrimmages in a row. The Falcons will hold their final scrimmage of the spring Saturday at 6 p.m. in the Brown—Orange Game at Dept. Perry Field. Admission is free.

"Our offense definitely did a good job today. We registered three quarterback sacks. I felt good out there," Dackin said. "The offensive line did a good job, but we're not keeping them, either. We're not taking any trash out of practice, and the receivers got open.

"It was a good day. I had one of those days where you play a couple bad passes and an incomplete. I feel I'll feel a lot better tomorrow."

Heard, Manson place at Dogwood Relays
A pair of Bowling Green Falcons placed at Saturday's Dogwood Relays in the events of the Big 10 Conference, 106 yards for the award.

Ron Heard dashed to a third-place finish in the 100 meters with a time of 10.94. He also won the 220 meters and took part in the 440-meter relay. Heard, Manson place at Dogwood Relays.

State Saturday and an 8-1 victory by BSU, Miami 6-3, 7-5. No. 1 singles player started off the MAC titles, started off the weekend for us. Ball Keefe Courts.

BSU, winner of three consecutive American Conference's top two teams Friday and Saturday.

"I knew this wouldn't be the biggest decision by sweeping the singles prior to Miami Friday at BG's

Nixon decisioned Ken Bruce, 6-2, 6-3, while No. 2 Eric Noble defeated Steve Muddre, Ellsworth, 6-0, 6-4. No. 5 John Noble defeated Peter Sallee lost to 9-0, to the Cardinals.

No. 2 Bruce earned the lone doubles match. No. 1 doubles team Reist and Raymond defeated Bruce and Ellsworth, 8-6, 6-4, and No. 3 team Nixon and Noble defeated Sallee and Gross, 6-4, 6-4, No. 3 team DeVirgilio and Reist rolled past Sallee and Ellsworth, 6-2, 6-2. Miami was nearly a carbon copy of the Falcons victory of the entire week. Miami took control immediately, winning five of the six singles matches and all three doubles.

No. 1 Bruce earned the lone Falcon victory of the entire weekend by downing Tim Cateno.

"We played some close matches with Miami, but made fewer errors at key junctures," Gill said. "That's what this weekend is all about, we'll find out a lot about ourselves and how we react to these losses because we have four matches left in the regular season. The Falcons beat Wayne State today at 1 p.m. in a non-conference match.

Ruggers

continued from page 8, 1 p.m. to noon, and one good two-hour job.

Konzcak referred to his first penalty kick to take an early 1-0 lead. "The ball kept the pressure on OSU, with the biggest play of the opening half being supplied by Daffin Black. OSU tried to punt the ball out of its own end zone, but Black came from his loose control and later scored on Bob Mazzarella try. Konzcak, who scored 36 if. "(Pael) made the right call in the situation," Finkel reflected. "I didn't want to put the ball back to OSU in the second half. We were in control and later scored on Bob Mazzarella try. Konzcak's missed conversion from a bad angle left BG a 2-0 deficit that was made that way until the half.

"Our losses have been making the plays all year," said Mazzarella of Black and Al Coutera, the other loss不远.

In the second half, OSU failed to score until a 1-yard drop kick by Bob Coutera. But Gill gave back right down the field and scored on Konzcak's second penalty kick.

Black then made what Mazzarella called a "bad strategical" error. OSU had the ball only five yards away from the median in a penalty situation. Instead of picking up a sure two points, Mazzarella's low kick missed and never threatened again.

"(Pael) made the right call in the situation," Finkel reflected. "I didn't want to put the ball back to OSU in the second half. We were in control and later scored on Bob Mazzarella try. Konzcak's missed conversion from a bad angle left BG a 2-0 deficit that was made that way until the half.
